EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: After very carefully reviewing the previously applied Barth et al reference in view of applicant's analysis and arguments, the Examiner agrees that Barth et al does not disclose or reasonably suggest the optical switch claimed herein. It is agreed that Barth et al does not disclose or suggest a micropump, and thus does not disclose or suggest moving an optical switching member using a micropump. Additionally, it is agreed that the Barth et al optical switching element (liquid bubble) is not moved by pressure from another liquid as a result of pumping the other liquid. The Examiner's characterization of the Barth et al reference in the previously applied rejection is thus incorrect, and such rejection is hereby withdrawn. Claims 1-12 and 14-18 herein are thus patentably distinct over Barth et al and all other prior art of record and are, accordingly, allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
